Subject: Response to Question Regarding Adding Modeling Analyses Files to Dockets

Hi Laurel,

Good news! It looks like we can make a note in FDMS stating to contact EPA if someone wants the modeling data. I also talked to Crystal this morning and she said we have done this in the past (maybe with ND RH. I was going to look for the comment this morning).

I'll work on getting the comment drafted today and let you know when it's ready for review. The CD is on your desk.

Let me know if you have any questions.

Thank you.

Hi, Abby –

FDMS does not accept modeling/database file types. Our standard practice is to keep these types of files on a separate drive (CD, DVD, USB, etc.) and put a note in the related FDMS entry indicating that it's a physical item. For this request, it would probably be a good idea if the

metadata indicated that the data files could be accessed through the Regional office.

Here is an example viewable on Regulations.gov: EPA-HQ-OW-2010-0222-0006

Many thanks!

Subject: Question Regarding Adding Modeling Analyses Files to Dockets

Good Afternoon,

We received a disk from Basin Electric with thousands of modeling analyses files. In the past, we have notated in the docket to contact EPA if someone would like access to files (these were mostly files not supported by FDMS). If we upload all these files to the docket, it will create an extremely large burden when compiling the administrative index, which we are fully expecting to have to do. Is there a best practice in this scenario as to if we need to upload every file to the docket or have folks contact us if they would like access to the files? Any recommendations you may have would be very helpful.

Thank you.
